

Day 2-8

Piglets – Day 2 of age

Tonistry Px

Program for young nursing pigs starting on the 2nd day of life (>24 hours).

Objective: Optimize the development of the small intestine in young pigs

1 Mixing Instructions - for a 3% isotonic Tonistry Px solution:

To make 1 pint: Mix 1 Tonistry Px pink tablespoon ( 15 grams) per pint of water

To make 1 gallon: Mix 1 Tonistry Px pink scoop ( 117 grams) per gallon of water

2 Feeding Instructions:

Feed 1 pint (473 ml) per litter per day

3 Feeding Frequency & Duration:

Feed once daily for 7 days beginning on Day 2 of age (Days 2 through 8)

Notes: Pigs should always have access to fresh water. If possible, clean pans daily. Mix fresh daily.

Variations: You can feed 3% Tonistry Px solution for 2 to 3 additional days prior to weaning preparing the pigs for the stress of weaning and transportation.

Hints & Suggestions:

Add dry feed or water/gruel to the pans after day 8

Number of Litters	Daily Amount of Tonistry Px Needed	Volume of 3% Tonistry Px Solution
1 litter	1 x  pink tablespoon	1 pint
8 litters	1 x  pink scoop	1 gallon
40 litters	5 x  pink scoops	5 gallons
80 litters	10 x  pink scoops	10 gallons
120 litters	15 x  pink scoops	15 gallons
